New & Existing Buildings.
Strata-Commercial-Residential

Leading Strata Security Intercom Specialists

Our Service Department can offer you a full range of service & repairs to all of your existing intercoms.

At Unitcom we can offer you an honest appraisal on the condition of your current intercom system and the likelihood of being able to successfully repair it.

If we find that your intercom system is in need of replacing we can often use the existing wiring and only change the intercom hardware, i.e. front entry panel, internal handsets and power supply. This dramatically reduces the cost in labor intensive tasks such as running new cables in an existing structure, when installed correctly there is no need for these cables to be replaced. Let Unitcom supply you with a no obligation, free quote.

Our experience and knowledge can guide you in your decision making process. Giving you the best possible outcome for your specific requirements. Whether it is a single entry audio system, or a multi entry digital video system.

100% Made & Designed by Unitcom with over 40 years of experience in the industry. Decades of research and the development into designing and manufacturing of our very own high grade stainless steel range using all Australian materials. 3mm thick vandal and weather resistant 316 Marine Grade Stainless Steel front entrance panels incorporating our 316 Stainless dome press buttons.

As well as our matching surface wall mount vandal resistant enclosures with rain-shield, available with adaptor plates to cover old panel holes.

These are recommended for coastal areas or areas with a high likelihood of vandalism.

There is provision underneath the box for a secure EM key-switch (energy provider key) that replaces the insecure NMB key for meter access.

Designed primarily for Comelit and Golmar electronic ranges.

Full custom entrance panels offer a solution for any size or shape where it is not practical to fit a standard entry panel. Aluminum, Brass or Stainless.

'You can make the most of our 40+ Years of experience'

We are often contacted by other intercom repair companies to sub-contract and repair systems. Importers of intercom equipment refer us as their leading service and / or installers.

Unitcom is on the recommended installers list for insurance claim repairs in Sydney & Wollongong areas.

Our stainless steel panels are listed on specification lists for department of housing and other developers.

OLYMPIC VILLAGE

Our history includes large sites such as the entire Olympic Village precinct installed by Unitcom.
